Using Open OnDemand to run MATLAB programs

Steve Krueger

September 28, 2020

1. Download the .m files on `http://www.inscc.utah.edu/~krueger/5300/` following Exercise 5 to your computer: `print_gamma.m` and `example_table.m`

2. Connect to Open OnDemand via web browser: `https://ondemand.chpc.utah.edu` and authenticate with CHPC user name and password.

3. Files menu (at top) > [select directory].

    (a) Make a new directory.

    (b) Upload the two files to this directory.

    (c) Return to OnDemand home page.

4. Interactive Apps menu (at top) > MATLAB

    (a) Use default settings (no need to change any settings).

    (b) Click blue Launch button at bottom.

    (c) Your MATLAB job appears: Click Launch MATLAB.

    (d) Your MATLAB GUI appears.

    (e) Adjust windows to make editor window larger by dragging.

    (f) Navigate to your new directory and double-click.

    (g) Double click on `example_table.m` (its contents appear in Editor window).

    (h) Run this (click green arrow above window).

    (i) Results appear in Command window.
