

Timothy J. Garrett

Education

University of Washington, Ph.D., Atmospheric Sciences, 2000

University of Washington, M.S. Atmospheric Sciences, 1995

University of Waterloo, B.Sc. Physics (*Honours*), 1992

Academic Positions

Professor with Tenure, Department of Atmospheric Sciences, *University of Utah*, 2014 - present

Visiting Professor, *Université de Lille I*, Lille, France, 2016-2017

Visiting Professor, *Université Blaise Pascal II*, Clermont-Ferrand, France, Summer, 2013

Associate Professor with Tenure, Department of Atmospheric Sciences, *University of Utah*, 2008 - present

Visiting Professor, *Université de Lille I*, Lille, France, 2008-2009

Assistant Professor, Meteorology Department, *University of Utah*, 2002 - 2007

Huber Fellow, Princeton Environmental Institute, *Princeton University*, 2000 - 2002

Commercial Positions

Chief Scientific Advisor: *Particle Flux Analytics* 2018 - present

Co-Founder and President: *Particle Flux Analytics* 2015 - 2018

Co-Founder: *Fallgatter Technologies* 2012 - 2015

Advisor: *Belua*, 2014 - 2016

Research interests

Clouds and precipitation play a key role in climate by removing pollutants from the atmosphere, shielding the Earth from sunlight, acting as pistons in the atmospheric heat engine, and serving as a lynchpin in the water cycle. They are also extraordinarily dynamic over a vast range of interacting scales in time and space, and this makes them difficult to understand. My research aims to describe these phenomena using a combination of theory, measurements, and numerical modeling.

Refereed Publications

16. **Garrett, T. J.**: *Ship Tracks: An Example of Aerosol-Cloud Interactions*. Masters Thesis, University of Washington, 1995.

Invited Presentations

1. *Are the impacts of aerosols on convective cloud fields constrained by bulk tropospheric thermodynamics?* Short-Lived Climate Pollutants Workshops, Jeju-do, South Korea, November 2018
2. *New puzzles in precipitation microphysics revealed by the Multi Angle Snowflake Camera* Korean Meteorological Association Annual Meeting, Jeju-do, South Korea, October, 2018
3. *Impacts of Aerosols from Biomass Burning and Anthropogenic Pollution Sources on Low-Level Arctic Clouds*, American Meteorological Society Annual Meeting, Austin, Texas, January, 2018,
4. *Aerosols, clouds, and precipitation in the Arctic: Who's in charge?*, NETCARE Workshop, University of Toronto, Toronto, November, 2017
5. *Energy, Thermodynamics, and the Human Enterprise* Crans Meeting on Energy, Finance, Economy and Governance Risks, Crans, Switzerland, July, 2017
6. *The distinctive nature of aerosol-cloud-radiation feedbacks in the Arctic.* University of Leipzig, Leipzig, Germany, May, 2017.
7. *Impacts of long-range aerosol transport on phase transitions in Arctic clouds*, SLCP Meeting, Gangneung, South Korea, February 2017
8. *Power laws in tropical cloud fields and the relationship to atmospheric stability*, EECLAT Workshop, Baie de la Somme, January 2017
9. *Turbulence and temperature effects on hydrometeor fallspeed.* Université de Grenoble, France, January, 2017
10. *Turbulence and temperature effects on hydrometeor fallspeed.* Université Blaise-Pascal, Clermont-Ferrand, France, November, 2016
11. *Turbulence and temperature effects on hydrometeor fallspeed.* École Polytechnique Fédérale de Lausanne, Lausanne, Switzerland, September, 2016
12. *The distinctive nature of aerosol-cloud-radiation feedbacks in the Arctic.* Yonsei University, Seoul, Korea, February 20, 2016.
13. *The complexity of interactions between aerosols, clouds, precipitation and radiation in the Arctic.* Korean Meteorological Society workshop on Short-Lived Pollutants. Songdo, Korea, February 13, 2016
14. *The distinctive nature of aerosol-cloud-radiation feedbacks in the Arctic.* Seoul National University, Seoul, Korea, February 14, 2016.
15. *Market expectations in retirement planning: an evolutionary and thermodynamic perspective.* Retirement Income Industry Association Advisor Forum Week, Fort Lauderdale, March 11, 2015
16. *Aerosols, clouds, precipitation, radiation and climate: A problem of interactions across scales*, Korean Meteorological Society Annual Meeting, Jeju, Korea, Oct 13, 2014
17. *Aerosols, clouds, precipitation, radiation and climate: A problem of interactions across scales*, Gangneung University, Korea, Oct 16, 2014

18. *The Jevons Paradox: Why the increasing energy efficiency of the economy is accelerating global climate change* Duke University School of the Environment, Durham, NC, Sept 12, 2014
19. *Wealth is Power. What physics tells us about our financial future.* Chartered Financial Analyst Society of Indianapolis Annual Meeting. Carmel, IN, March 17, 2014.
20. *Why is the Arctic summer clean? Will the Arctic get cleaner? How wet scavenging controls the impacts of mid-latitude pollution in the Arctic.* AGU Fall Meeting, San Francisco, December 9-13, 2013
21. *Photographing snowflakes in freefall at Alta:* Université Blaise Pascal II, Clermont-Ferrand, France, May, 2013
22. *Thermodynamic constraints on economic innovation and growth:* Gruter Institute: Innovation, Economic Growth and Human Behavior, Squaw Valley, June 21-23, 2012
23. *Modes of growth in economic systems:* Gruter Institute: Economic Growth: Costs, Causes and Effects, Squaw Valley, June 23-25, 2012.
24. *Mountain meteorology: Precipitation and snow crystals in the atmosphere:* Avalanche science workshop, Mammoth, California, March 2012.
25. *Wealth is Power: Consequences and Implications for Retirees:* Keynote Talk for the Retirement Income Industry Association, Chicago, March, 2012
26. *A Simple Method for Diagnosing the Dynamic Response of Cloudy Air to Diabatic Heating and Cooling* University of Berkeley, California, February, 2012.
27. *Can we provide thermodynamic constraints for the long-term coupled evolution of the economy and the atmosphere?* Third Santa Fe Conference on Global and Regional Climate Change, October 2011.
28. *How will aerosol-cloud-precipitation-radiation interactions evolve in a warming Arctic?* Michigan Tech., September, 2011.
29. *How will aerosol-cloud-precipitation-radiation interactions evolve in a warming Arctic?* NASA Jet Propulsion Laboratory, August, 2011
30. *Application of simple (non-equilibrium) thermodynamics to constrain long-range economic growth and its coupling to atmospheric concentrations of CO₂* Northwest Research Associates, July, 2011
31. *Is it physically possible to have our economic prosperity and stabilize atmospheric CO₂?:* University of Edinburgh, June, 2011
32. *Will warming temperatures mediate the effects of short-lived aerosol pollutants on Arctic climate?:* University of Michigan, January, 2011
33. *Mammatus Clouds: A Window Into the Role of Radiation-Dynamic Feedbacks in Stratiform Cloud Evolution:* Texas A&M University, December, 2010
34. *Is it possible to de-couple economic wealth from carbon dioxide emission rates?:* Pacific Institute for Climate Solutions, University of Victoria, May, 2010
35. *Long-range pollution transport to the Arctic and its role in modulating regional aerosol-cloud-climate interactions:* Max-Planck Institute for Meteorology, Hamburg, Germany, June, 2009

36. *Remote sensing of clouds, precipitation and radiation in the Arctic and associated interactions with pollution from mid-latitudes*: Université de Blaise Pascal, Clermont-Ferrand, France, February, 2009
37. *A simple thermodynamic approach to the economic evolution of civilization and its carbon dioxide emissions*: Max Planck Institute for Biogeochemistry, Jena, Germany, January 2009
38. *What exactly is the difference between clear-sky and cloud?*: University of Bremen, December 2008
39. *All other things being equal: On the role of feedback in aerosol-cloud interactions*. University of Edinburgh, September, 2008
40. *Arctic climate forcing through aerosol-cloud interactions*. AMAP Workshop on Non-CO2 Climate Forcers, Oslo, Norway, September 2008
41. *On the evolution of cloud systems*: Frontiers of Climate Conference, Kavli Institute of Theoretical Physics, Santa Barbara, California, May, 2008
42. *A look at the evolution of clouds*: University of Arizona, Tucson, April 2008
43. *Longwave and shortwave effects of aerosol interactions with clouds in the Arctic*: Norwegian Institute for Air Research, Kjeller, Norway, November 2007.
44. *Might anthropogenic aerosol be stimulating Arctic sea ice melting through their effects on clouds?* University of Toronto, September, 2007
45. *Is Arctic sea-ice melting stimulated by aerosol-cloud-radiative interactions?* Gordon Conference on Radiation and Climate, July, 2007.
46. *Is the Cloud System Homeostatic?* Dalhousie University, Canada, May, 2007
47. *Arctic Haze and Winter Warming* Arctic Climate Workshop sponsored by Clean Air Task Force, NASA GISS, January, 2007
48. *Pollution and the Arctic: 200 years of Man-Made Climate Change*, Wallace Stegner Center, University of Utah, October 2006
49. *Exploring Pollution-Cloud-Climate Interactions in the Arctic*, State University of New York, September 2006
50. *Exploring Pollution-Cloud-Climate Interactions in the Arctic*, Brookhaven National Laboratories, September 2006

Courses

Undergraduate *Atmos 5200: Cloud Physics*

Atmos 5130: Atmospheric Thermodynamics

Atmos 5140: Atmospheric Radiation

Atmos 5210: Physical Meteorology

Radiative Transfer and Climate, Thermodynamics, Cloud Physics

Atmos 3410: Meteorological Analysis

Using Matlab for time series analysis, fourier analysis, statistical analysis, and numerical modeling

Graduate *Atmos 6200: Radiative Transfer and Climate*

Physical principles and mathematical methods for approaching longwave and shortwave radiative transfer in the atmosphere

Atmos 6300: Advanced Cloud Physics

Cloud thermodynamics, microphysical and radiative processes, similarity theory, cloud dynamics, mixed-layer modeling

Atmos 6020: Physical Meteorology

Radiative Transfer and Climate, Thermodynamics, Cloud Physics

Graduate Students Advised

1. Bradley Navarro. M. S. 2003 *Microphysical and Radiative Evolution of a Cirrus Anvil During CRYSTAL-FACE*
2. Nathaniel Mullins M. S. 2005 *Case Study of a Jet Contrail at the Tropopause: Properties, Evolution and Radiative Effects*
3. Margaret Kimball M. S. 2006 *Convectively Driven Formation of Thin Cirrus in the Tropopause Transition Layer*
4. Lance Avey M. S. 2006 *Evaluation of the aerosol indirect effect using satellite, tracer transport model, and aircraft data from ICARTT*
5. Chuanfeng Zhao Ph. D. 2007 *Effects of Arctic Haze on Low-Level Stratus Properties and the Surface Radiation Budget*
6. Stina Sjöström, M. S. Uppsala University, Sweden 2007 *Numerical Exploration of Radiative-Dynamic Interactions in Cirrus*
7. Kyle Tietze, 2007 - 2011, M. S., 2010 *Space Based Evaluation of the Aerosol Indirect Effect in the Arctic*
8. Clint Schmidt, 2007 - 2013, M. S. 2010 *A Simplified Model for Understanding the Evolution of Cirrus Clouds*
9. Melissa Maestas, 2008 - 2009
10. Sara Brattström, M. S. Stockholm University, Sweden, 2011 *The role of scavenging in the seasonal transport of black carbon and sulfate to the Arctic*
11. Zhiyu Wang, 2009 - present
12. Quentin Coopman, 2013 - 2016, Ph.D., 2016 *Impact of Aerosols on Arctic Clouds*
13. Shailesh Alva, 2014 - 2015
14. Maximilien Patou, 2015 - present
15. Kyle Fitch, 2017 to present
16. Ahmad Talei, 2017 to present

Graduate Student Committees

1. Eric Vernon, M.S., 2002
2. Yuying Zhang M.S., 2002
3. Yaping Li, M.S. 2002
4. Haiyan Jiang, Ph.D. 2004
5. Kristen Dowd, M. S. 2004
6. Yuying Zhang, Ph. D. 2006
7. Ryan Riveland, M. S. 2006
8. Helena Schlueter, M. S. 2006
9. Daniel Hartsock, M.S. 2006
10. Jennifer Esker, M. S. 2006
11. Scott Robertson, M. S. 2007
12. Lis Cohen, M.S. 2008
13. Betsy Dupont, M.S. 2010
14. Peter Bogenshutz Ph.D. 2011
15. Michael Peterson, M. S. 2011
16. Stephen Bannister (through the Department of Economics)
17. Shan Zheng, Ph.D. *Université de Lille*
18. Samantha Balaich, M.S. 2012
19. Christy Wall, Ph.D. 2013
20. Kevin Hammonds, M.S. 2013
21. Chris Schwartz, Ph.D. 2013
22. Ian Glenn, M.S. 2013, Ph.D. 2017
23. Trevor Ferguson, M.S., 2014
24. Arpa Hudait Ph. D. 2018
25. Quentin Coopman, Ph.D. 2016
26. Sarah Bang, Ph.D 2018
27. Jeanna Mascio, Ph.D. 2018

Service

1. University Promotion and Tenure Advisory Committee, 2018 to present
2. University Graduate Council, 2014 to 2016
3. University of Utah Senate, 2010 to 2013
4. University Personnel and Elections Committee 2010 to 2014
5. Editor, 2007-present, *Atmospheric Chemistry and Physics*
6. Associate Editor, 2003-2010, *Journal of Atmospheric Sciences*
7. Panel Review Committee for NASA NEWS, August, 2014
8. Panel Review Committee for DOE, May, 2012
9. Panel Review Committee for NASA CloudSat/Calipso July, 2010
10. Panel Review Committee for NOAA Office of Global Programs, October, 2004
11. Regular journal article reviewer for *Nature*, *Science* and *AMS*, AGU, EGU, Blackwell, and IEEE journals
12. Regular proposal reviewer for NASA, NSF, DOE, and NOAA

Outreach

1. Research on snowflake photography, energy and economic growth, Arctic pollution and clouds, and cirrus clouds has been profiled in independent articles for *National Geographic*, *New Scientist*, *Science et Vie*, *Weather.com*, *CBC Television*, *Fox News*, *NBC*, *Yahoo*, *Gizmodo*, *Science*, *Le Monde*, *Figaro*, *Vice*, *Wired*, *EOS*, *Continuum*, *AdvisorOne Research magazine*, *International Innovation*, *Institutional Investor*, *Audubon*, *Slashdot*, *Helix*, *Photonics*, *Powder*, *Owl*, *The Avalanche Review*, *KOMO*, *BBC-5*, *NPR*, *KCLU*, *Radio EcoShock*, *KSL*, *Fox13*, *Salt Lake Tribune*, *Deseret Morning News*, *PhysicsWorld*, *Science News for Students*, *The Statesman*, *Utah Stories*, and *Christian Science Monitor*
2. Garrett, T. J., 2014: *Snowflake Formation: A series of lessons plans for 4th through 6th grade*. Presented in Salt Lake City and Bountiful 4th Grade classrooms.
3. Presenter for “Science Movie Night” at the Downtown Public Library, December 9, 2014
4. Snowflake research featured for a 2013 documentary for The WeatherChannel entitled *Secrets of the Earth: Blizzards*
5. Snowflake research featured for a 2014 documentary for the Canadian Broadcasting Corporation entitled *The Nature of Things: Chasing Snowflakes*
6. Provide real-time snowflake photographs for the “Snowflake Showcase” website hosted by Alta Ski Area
7. Invited panelist for “Focussing Cache: The Science of Climate”, Utah State University, January 31, 2008

8. Presenter for “Natural History Now!” at the Utah Museum of Natural History, February 1, 2008
9. Presenter for Hogle Zoo, June 28, 2008
10. Alta Historical Society “Fireside Chat” 2011, 2012.
11. Presenter for American Meteorological Society Salt Lake Chapter 2013

Awards

1. *NASA New Investigator Program Award*, 2005 - 2008
2. *Huber Fellowship*, Princeton Environmental Institute, Princeton University, 2000 - 2002
3. *Atmospheric Chemistry Colloquium for Emerging Senior Scientists (ACCESS)*, Invited participant, 2002
4. *Outstanding Student Paper Award*, AGU Fall Meeting, 1999

Externally Awarded Research (Total \$3,620,377)

1. **NASA** *Optical Properties of Tropical Cirrus Clouds*. P. I. T. J. Garrett, Co-P.I. H. Gerber. \$136,389. 01/2002 - 01/2004.
2. **NSF** *Aerosol-Cloud-Radiation Interactions in the Arctic*. P.I. T. Garrett, co-P.I. Xiquan Dong, Gerald G. Mace. \$339,503. 04/2003 - 04/2006.
3. **NSF** *New Approaches for the Measurement of Microphysics in Extratropical Hurricanes*. P.I. T. J. Garrett. \$19,946, 07/2003 - 07/2004.
4. **NOAA** *2003 Aerosol-cloud-climate interactions downwind of North Eastern North America*. P.I. T. J. Garrett. \$351,234. 03/03 - 03/06.
5. **NASA** *Airborne Studies of Middle and Low-Latitude Cirrus*. P. I. T. J. Garrett. \$86,882. 01/04-01/05.
6. **NSF** *Formation and evolution of pileus cloud near the tropopause*. P. I. T. J. Garrett \$35,693. 1/1/06 - 12/31/06.
7. **NASA** (New Investigator Program Award) *Interaction between microphysics, radiation and dynamics in terrestrial cirrus*. P. I. T. J. Garrett \$339,976. 8/1/06 - 7/31/09.
8. **NSF** *Evaluation of Aerosol-Cloud-Radiation Processes and Feedbacks in the Alaskan Arctic*. P.I. T. J. Garrett \$324,121 6/1/07-5/30/10.
9. **Clean Air Task Force** *Quantifying the significance of mid-latitude pollution plumes to clouds and sea-ice melting in the Arctic*, \$100,000 6/1/07-10/30/09.
10. **NASA** *Evaluating tropical and mid-latitude cirrus properties using co-incident satellite and aircraft sensors*, P.I. T. J. Garrett, co-P.I. Jay Mace, \$240,000, 1/1/08-12/31/11
11. **Army** *Development of automated measurement techniques for improved parameterization of snowflakes in mesoscale weather models* \$49,620, 11/1/09-6/30/10

12. **Ewing Marion Kauffman Foundation** *How does energy govern innovation and global economic growth?* \$38,837, 4/1/2011 - 8/30/2012
13. **NASA** NASA Earth System Science Fellowship to Clinton Schmidt: *Application of CERES energy budget data to improve understanding of the dynamic role of clouds in the Earth's planetary albedo* \$90,000 9/1/2011 - 8/30/2014
14. **NSF** *Collaborative Research: The Wasatch Hydrometeor Aggregation and Riming Experiment* \$450,000 8/1/2011-7/31/2014
15. **Ewing Marion Kauffman Foundation** *Forecasting Civilization Expansion and Innovation as a Function of Energy Reserve Discovery* \$47,490, 4/1/2012 - 3/30/2013
16. **NASA** NASA Earth System Science Fellowship to Zhiyu Wang: *How will future Arctic sea ice decline impact atmospheric stability and cloudiness?* \$90,000 9/1/2012 - 8/30/2015
17. **NSF** *Impacts of distant pollution sources on microphysical transitions in Arctic clouds* \$459,658 9/1/2013 - 8/30/2016
18. **NASA** *A snowflake mass measurement device for the NASA Global Precipitation Measurement Mission* \$50,000 12/1/2013 - 6/30/2014
19. **NSF** Development of a Freefall Precipitation Camera for Weather Monitoring Systems. Sub-contract from Fallgatter Technologies: \$71,248, 5/1/2014 - 4/30/2015
20. **DOE** High temporal and spatial resolution measurement of hydrometeor mass for automated assessment of precipitation rate and type. Sub-contract from Particle Flux Analytics: \$102,032, 3/1/2017-12/31/2017
21. **DOE** Parameterization of arctic hydrometeor physics using new precipitation measurement technologies \$457,847, 9/1/2017 - 8/30/20

Field Work

1. **NASA CRYSTAL-FACE**, Summer 2002: Integrated Cloud Integrating Nephelometer (CIN) onto the NASA WB-57 aircraft for the study of Florida anvil cirrus.
2. **CNRC ETHEX**, Fall, 2003: Integrated CIN onto Canadian National Research Council CV-580 Airborne Facility for flight into mid-latitude Hurricane systems.
3. **NASA MidCiX**, Spring, 2004: Integrated CIN onto the the NASA WB-57 for the study of mid-latitude and sub-tropical anvil cirrus.
4. **NOAA ICARTT**, Summer, 2004: Integrated CIN, FSSP-100 and OAP 2D-C onto NOAA and CNRC aircraft for the study of the effects of North American pollution on cloud radiative properties.
5. **WASHARX**: 2012 to 2015: High resolution imaging of snowflakes at the High Altitude Research Laboratory for Diversity in Snow (HARoLDS) at 10,000' at the Alta Ski Area.
6. **Snowflake Settling Speed Experiment**: Winter 2017: Study of hydrometeor fallspeeds at Oliktok Point, Alaska.

Professional Memberships

American Meteorological Society. 2000 - present

American Geophysical Union 1998 - present
